Construction Completes on Seminole County Animal Control

Longwood, Fla. (August 14, 2009) – A celebration ceremony was held on August 13 to introduce the public to the newly renovated Animal Control Facility located at 232 Bush Loop in Sanford. A portion of the facility was lost in a fire back in February 2007. Bentley provided Architecture and Engineering services to not just re-construct the damaged portion of the building, but took the opportunity to improve the building’s functionality for the County staff and the animals of the shelter. This included 2 vet tech rooms, a cat bunk room, staff restroom as well as a larger sally port and storage for all the shelter’s supplies.

Since its inception in 1984, Bentley Architects + Engineers, Inc. has been providing Architectural and Engineering services throughout Central Florida and the United States. Bentley's services include Architectural Design, Land Development, Structural Engineering and Transportation Engineering. Having this combination of disciplines under one roof enables Bentley to provide its clients with innovative and cost-effective solutions to a variety of projects.

Shelter staff gave tours to all visitors on Aug. 13.

The new cat "bunk room."
